

Please do not allow LPFM to take priority over existing K-LOVE FM translator service. I listen all the time and have been listening for 10 years or more. My family, friends, and relatives in other towns are listening, and it makes us feel connected. There are announcements for local events and national announcements for bigger events. This way I get local, national and international news without flipping around.

I don't think we could locally afford to subsidise such quality programming. So, we would lose the power of many to provide for small areas and separately, it would not be cost effective.

K-Love provides positive music and inspiration at the highest level of professional quality. Our community can only benefit from a station that is committed to uplifting and encouraging it's listeners so we can better serve in our homes and jobs and even in traffic.
